MY ASPIRATIONS

"I'm a front-end developer who thrives on new challenges and collaborative environments. If you have a project that needs a creative and dedicated developer, I'd love to hear from you!"

INTRODUCTION

Experienced Software Engineer with a strong track record of reviewing software requirements, developing comprehensive curriculums, and establishing best practices for software testing. Skilled in customer service, communication, and Microsoft Office. Adept at ensuring software meets customer needs and enhancing the accuracy and reliability of software products. Graduated with a degree in Software Engineering. Eager to leverage my expertise in software engineering and management to drive impactful outcomes in a dynamic environment.

WORK EXPERIENCES

Web Developer

VietCV 1

11/2013-09/2016

- Developed and managed a comprehensive database of customer information, ensuring that all customer records were up-to-date and accurate
- Supported the development and testing of new software applications, ensuring a smooth transition to production
- Implemented a new document management system that improved document version control and access control
- Write HTML, CSS, and JavaScript that is cross-browser compatible.
- Integrate websites with Facebook, Twitter, and YouTube.

PROJECTS

Developer - Self project

2022-2024

- Deployed a web application firewall to protect against malicious web-based attacks
- Researched and identified the latest trends in web design to ensure the website is up-to-date
- Developed a data pipeline to ingest and process large amounts of data in real-time
- Wrote and edited content for the department's website, resulting in a 25% increase in website traffic
- Integrated a payment system that allowed customers to easily pay for products or services online
